THRU: Don Wills
        Mail Stop 111

FROM: James Sims / Duke Do
        (206) 440-4450 / (206) 440-4376

SUBJECT: **NW Region ITS Proprietary List, 2005-2007 Biennium – Supplement 2**

The NW Region is requesting blanket proprietary approval of **SEPAC and NextPhase
software** packages for signal controller operation, for the 2005-2007 Biennium. These
signal software packages are essential for synchronization with existing highway
facilities.

The SEPAC and NextPhase software will be used in traffic signal controllers to control
traffic signal systems. This software is essential for interconnection and synchronization
with other existing signal controllers, utilizing the same software, to complete a
coordinated signal system.

If you have any questions or need additional information on this matter, please contact
James Sims or Duke Do.
